

# ScreenShots of Kitchen Story Project

## Home.js

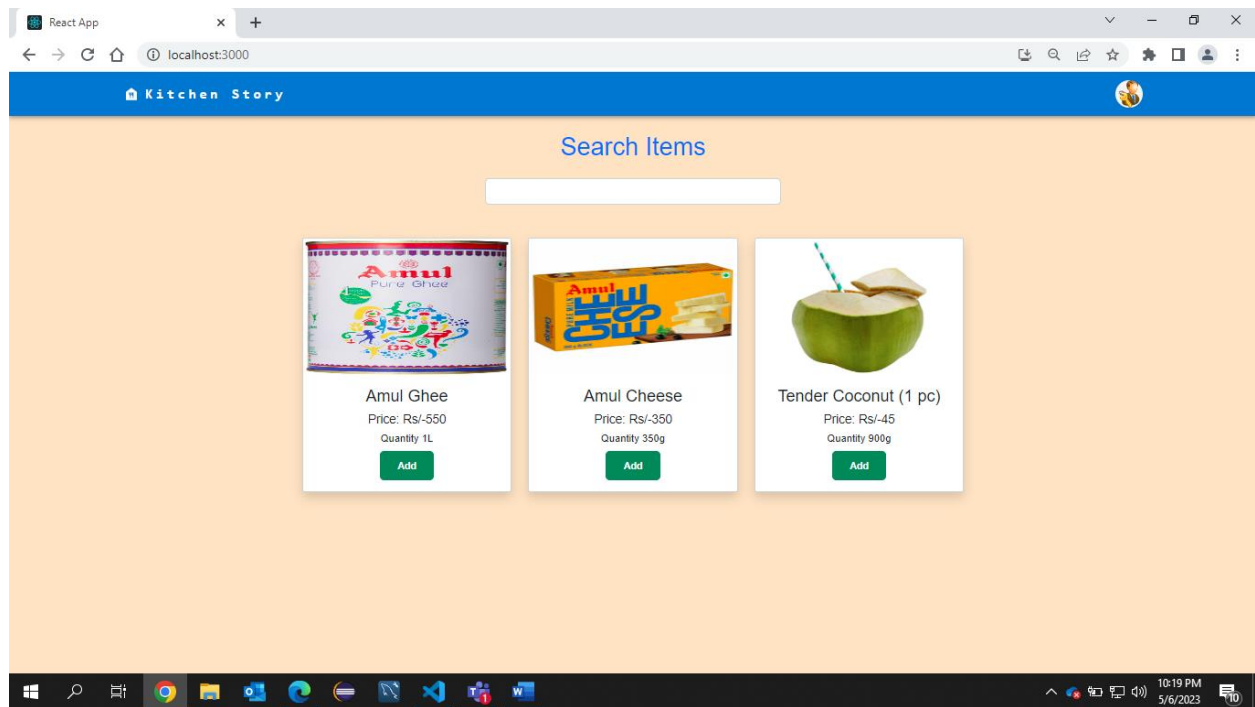

In the Home page all the Products are displayed here I have only taken 3 items for testing

This is a real time Search as we enter the name in Search field the items will keep changing without reloading

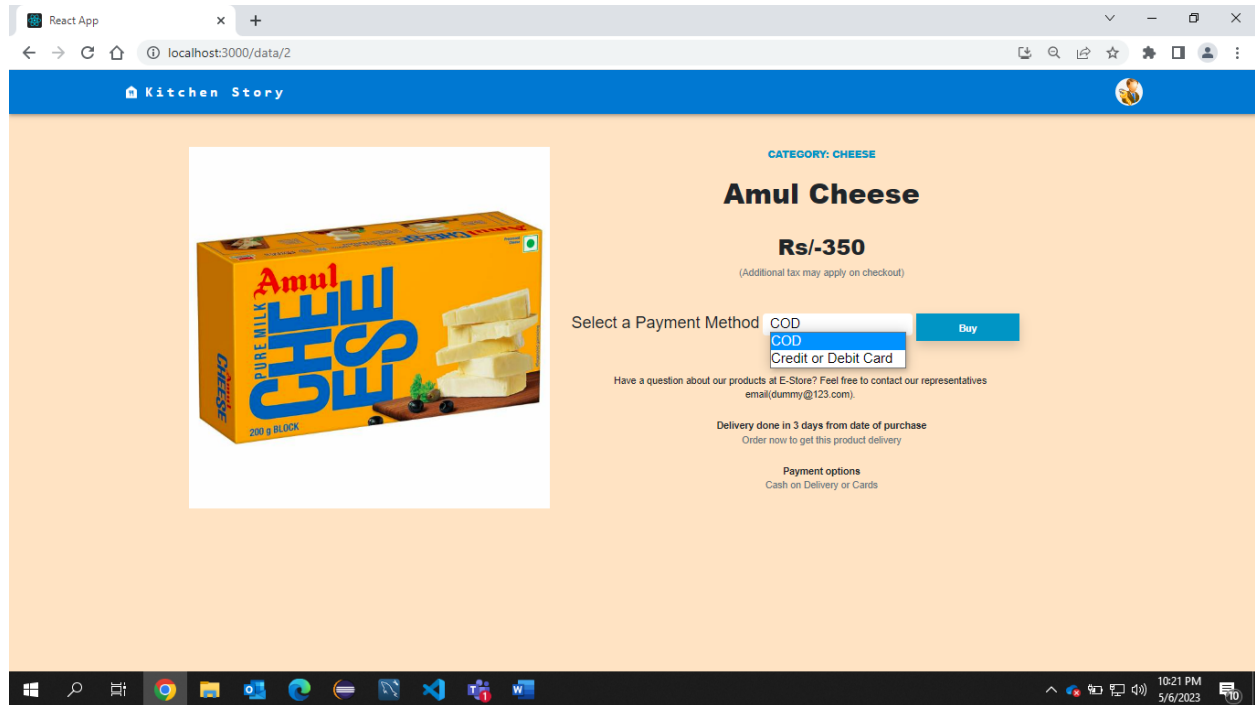

## If I Click on a Product

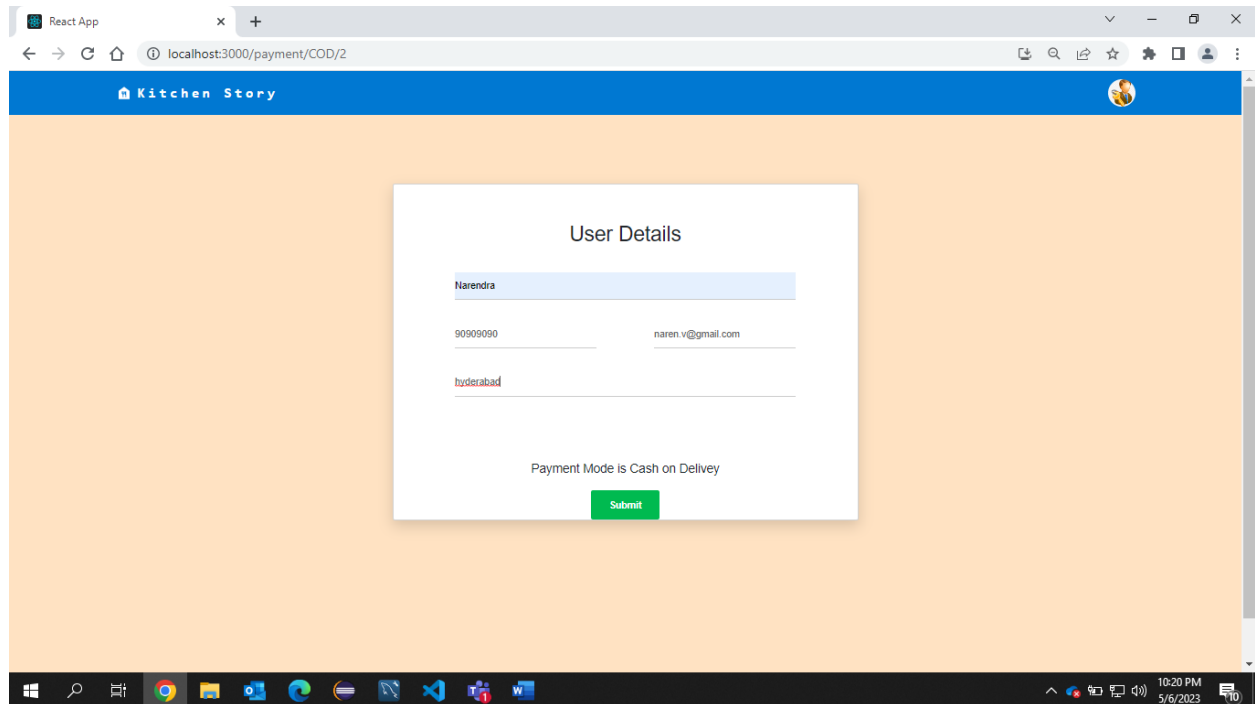

That Product Detailed View will be displayed

Here we have 2 options for Payment COD and Cards

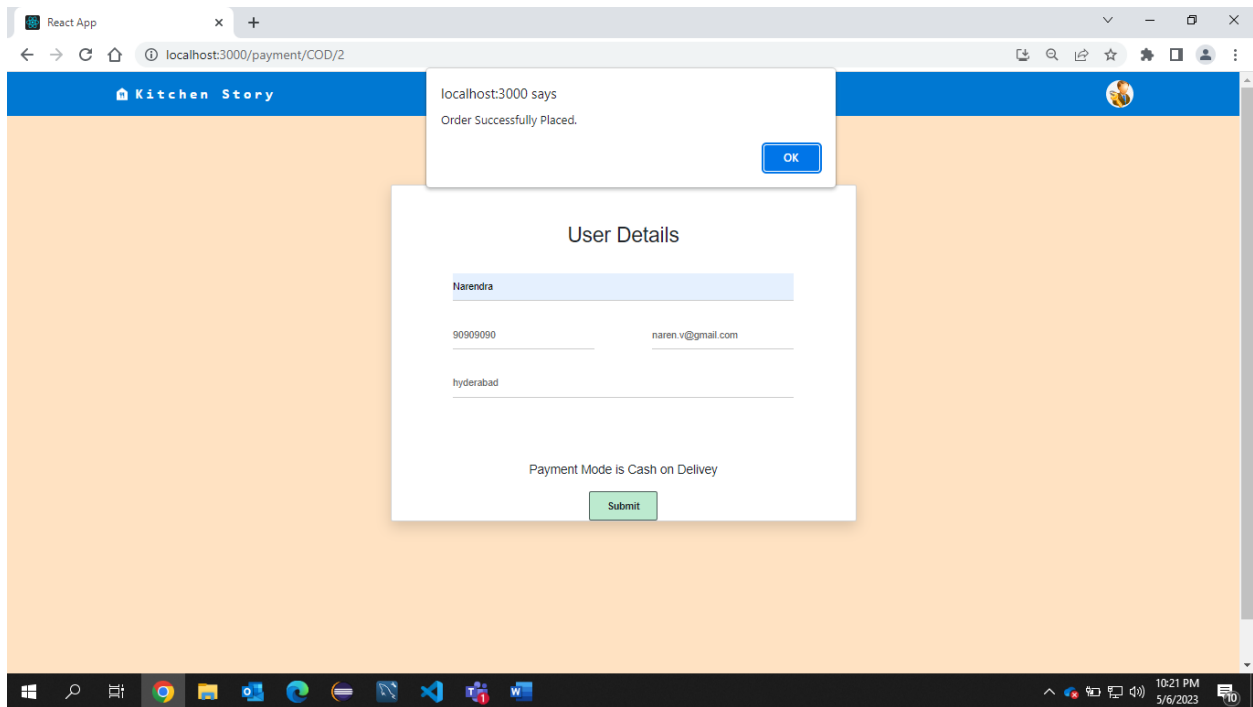

If I select COD and click on buy

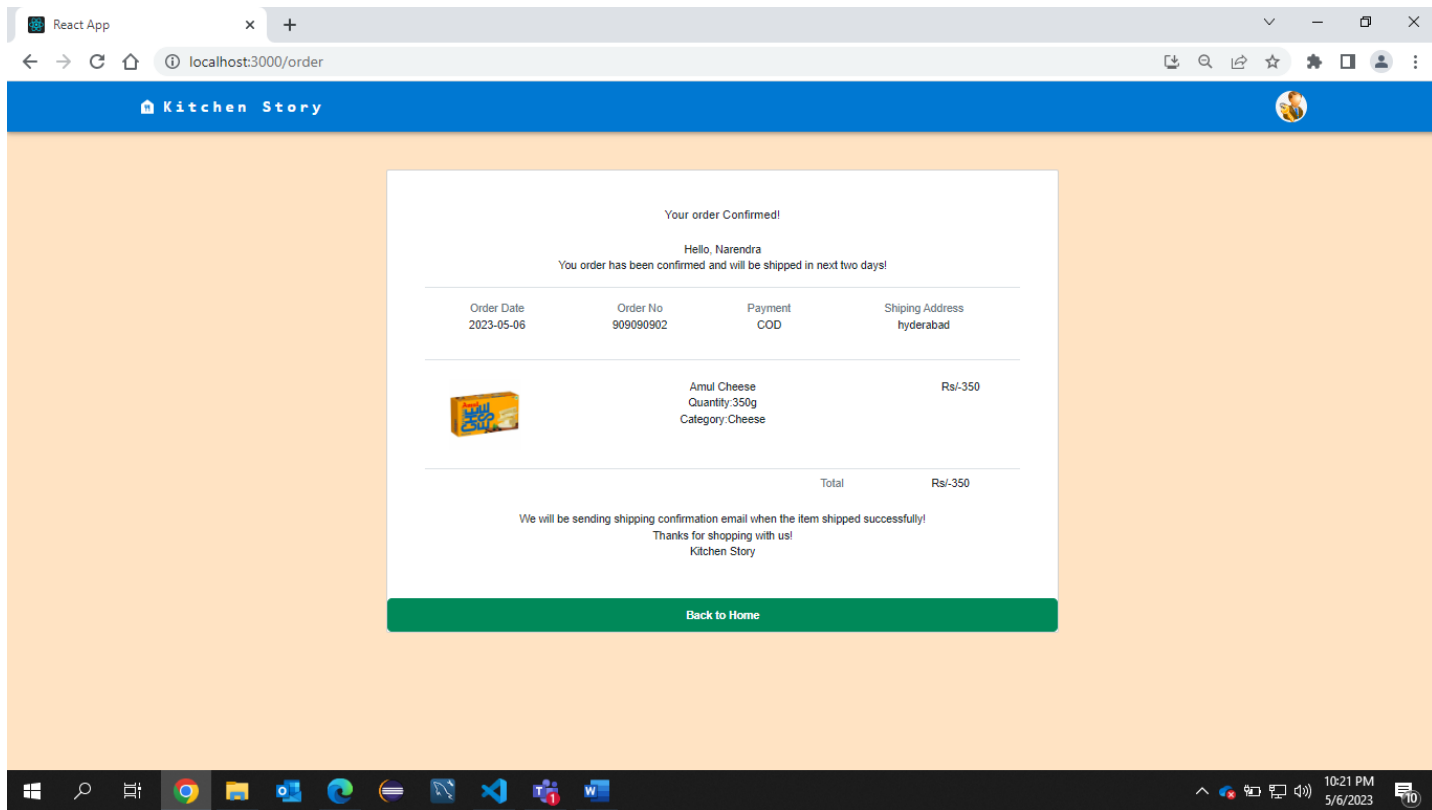

Then we have to enter User Details for Order conformation

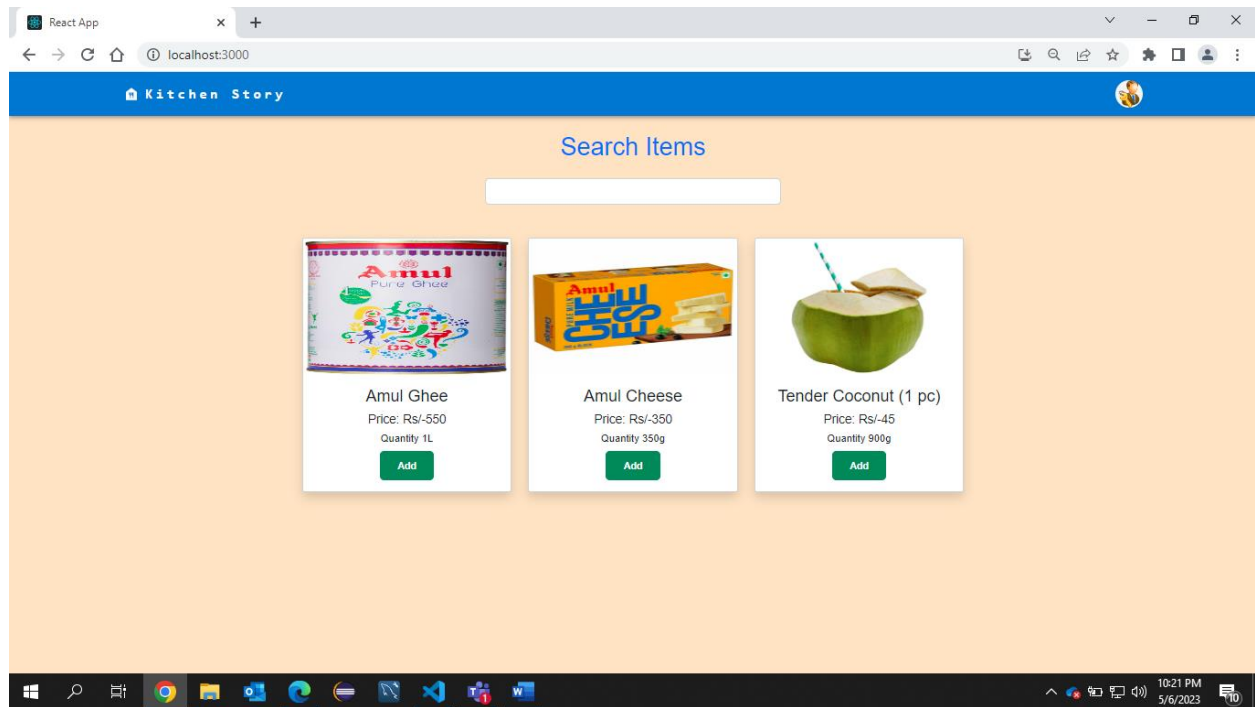

After that order will be placed Successfully

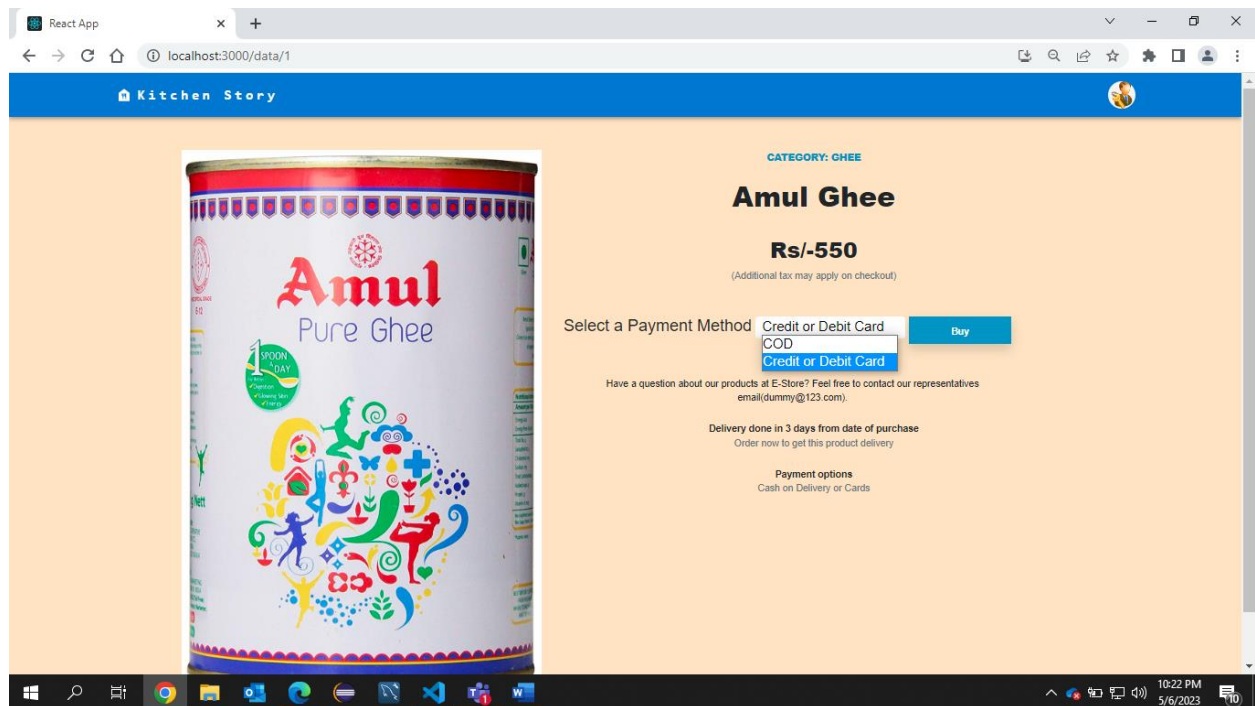

This is the conformation page for order

Again Form home page selecting another product

This time I am selecting payment type as Cards

Then I have enter Card details like number Expiry date and CVV along with User details

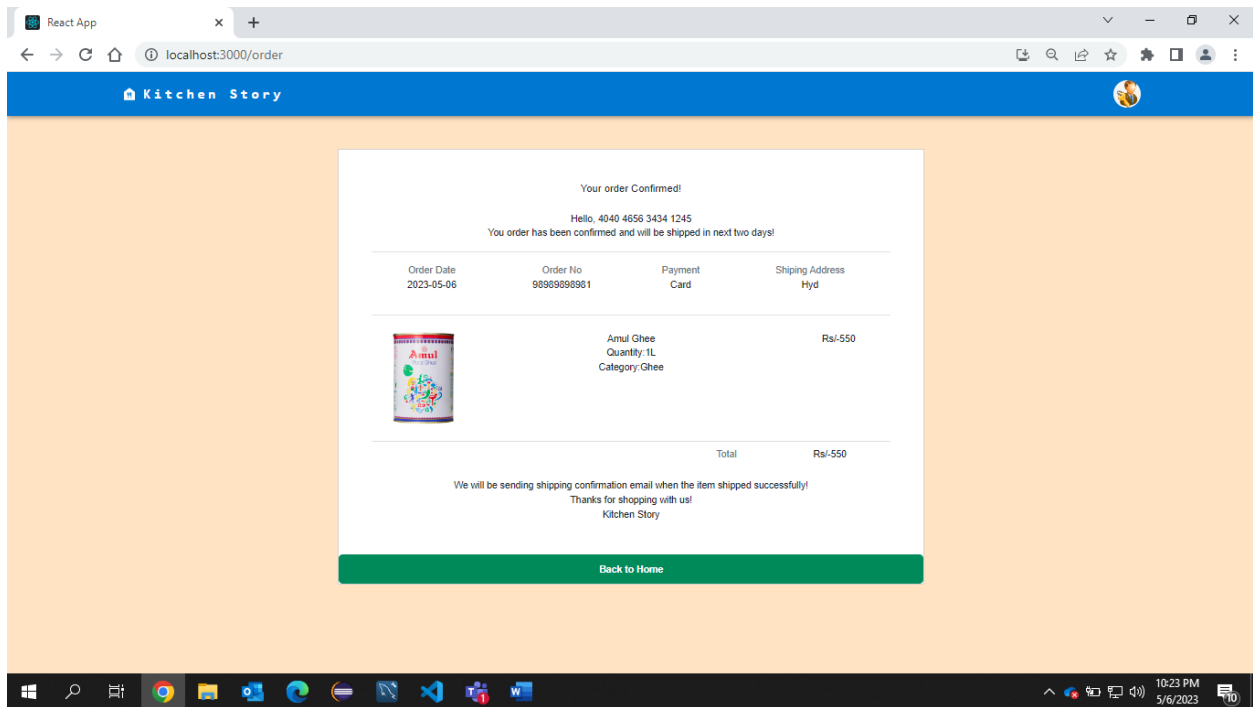

The screenshot shows a web browser window with the address bar displaying 'localhost:3000/payment/Card/1'. The page has a light orange background. A white form is centered on the page, titled 'User Details' and 'Payment Details'. The form contains the following fields:

- User Details:**
  - Name: Narendra
  - Phone Number: 9898989898
  - Email: naren@gmail.com
  - Address: Hyd
- Payment Details:**
  - Card Number: 4040 4656 3434 1245
  - Expiry Date: 01/2029
  - CVV: 878

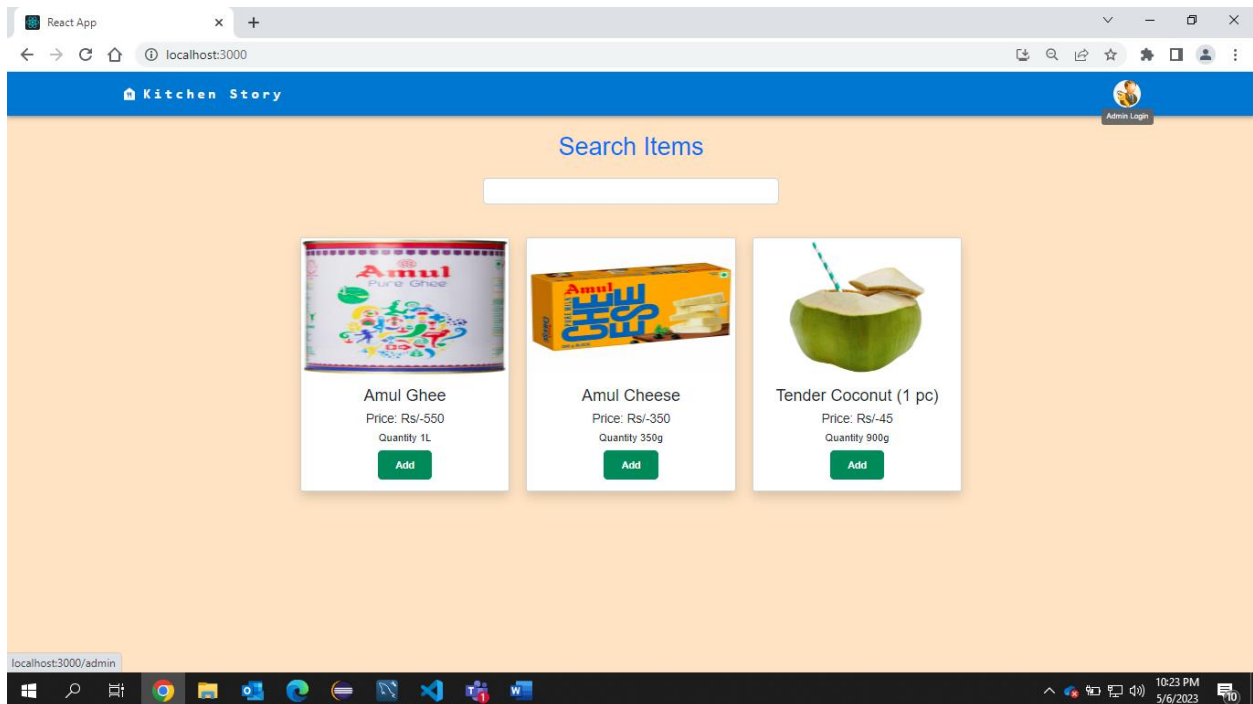

A green 'Submit' button is located at the bottom of the form.

This screenshot shows the same web application as the previous one, but with a success message dialog box displayed over the form. The dialog box contains the text: 'localhost:3000 says Order Successfully Placed.' and an 'OK' button. The form fields and the 'Submit' button are still visible in the background.

After that order will be placed successfully

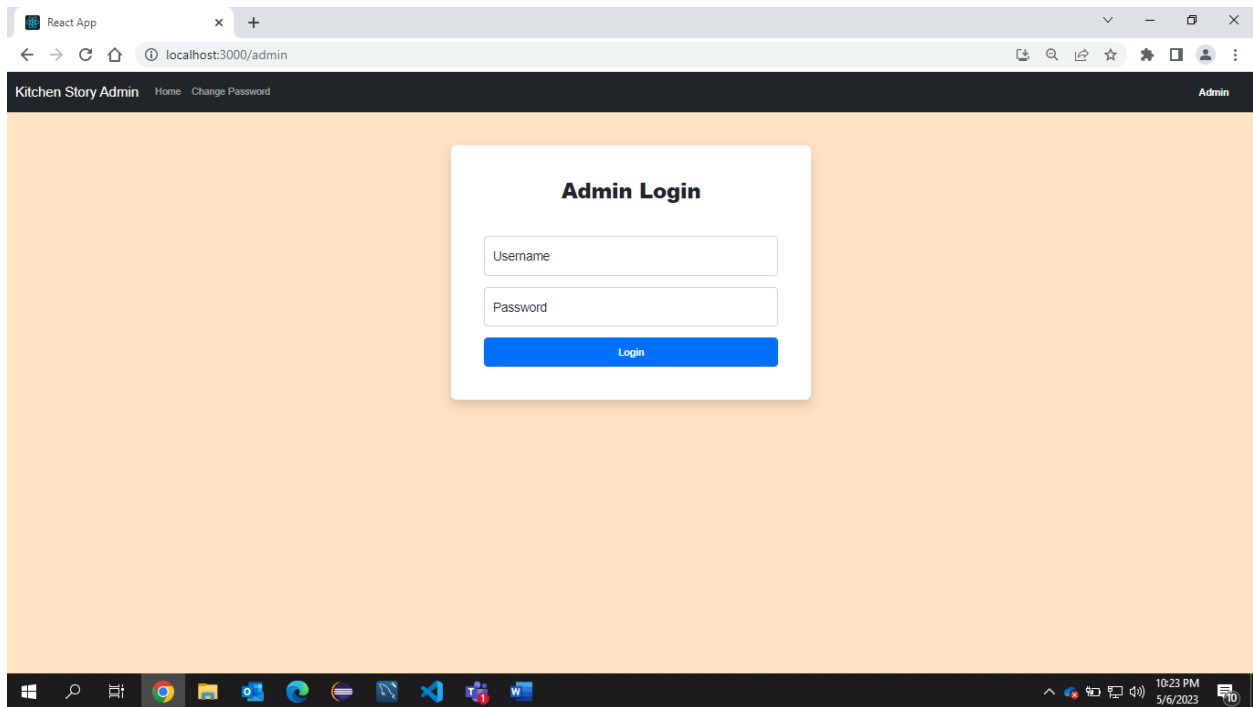

For the Admin Module There is a Button on Right side top As Admin Login

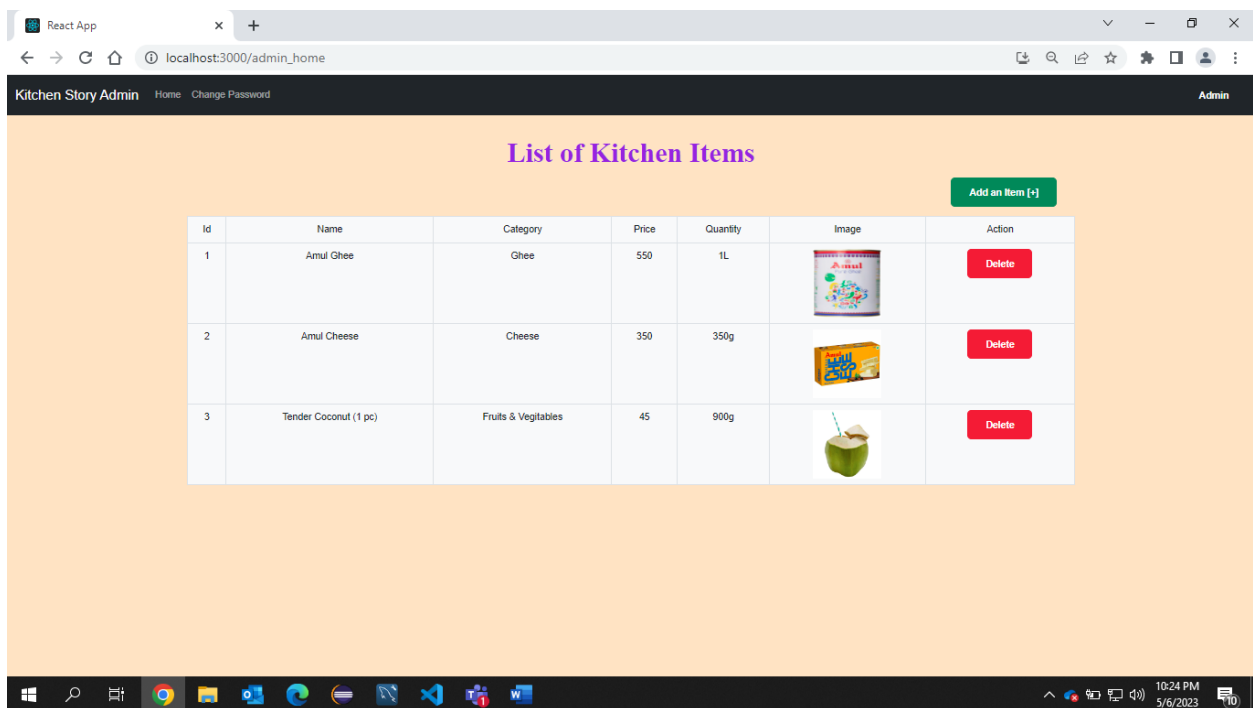

This is the admin login Page

After the Administrator has logged in

He will see a Master list of all Products With add and Delete feature

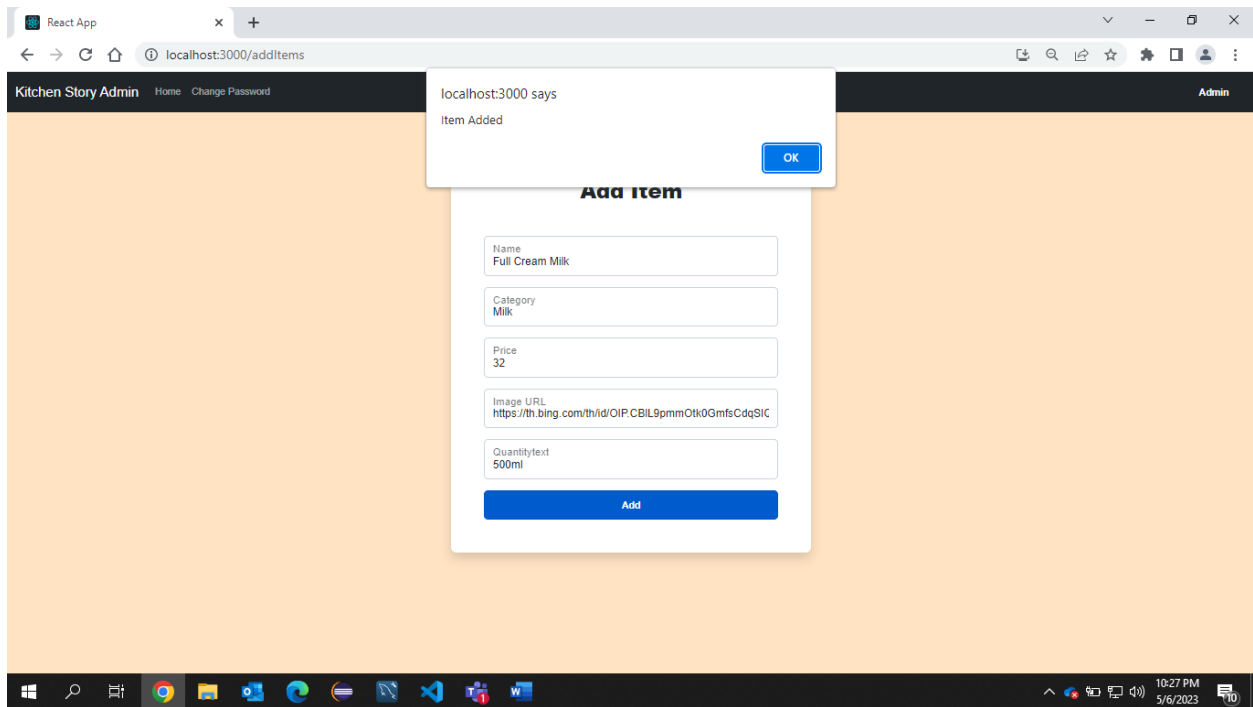

If I click on Additem this page will be displayed

The screenshot shows a web browser window with the address bar displaying 'localhost:3000/addItems'. The page title is 'Kitchen Story Admin' and the user is logged in as 'Admin'. The main content area is a light orange color. In the center, there is a white card titled 'Add Item'. The card contains five input fields: 'Name', 'Category', 'Price', 'Image URL', and 'Quantity/text'. Below these fields is a blue button labeled 'Add'.

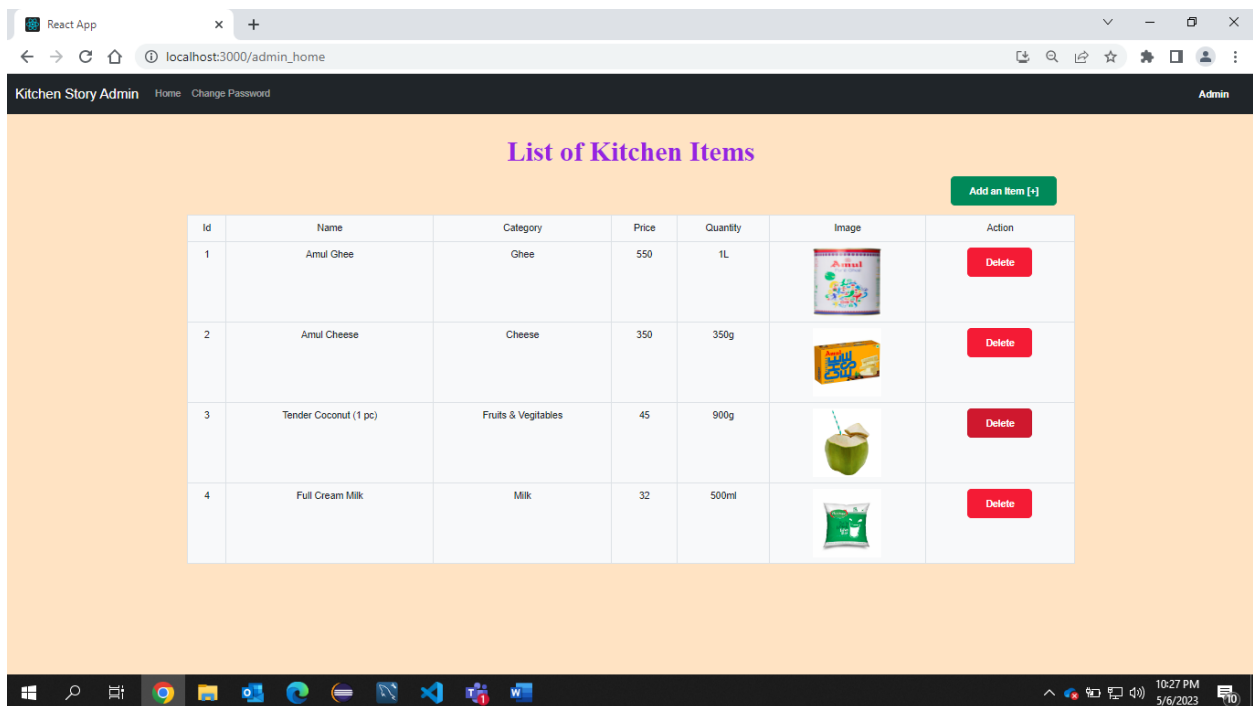

After filling all the details if I click on add

The screenshot shows the same 'Add Item' form as before, but with the following details filled in: 'Name' is 'Full Cream Milk', 'Category' is 'Milk', 'Price' is '32', 'Image URL' is 'https://th.bing.com/th/d/OIP/CBIL9pmmOtk0GmfsCdqSIC', and 'Quantity/text' is '500ml'. The blue 'Add' button is still visible at the bottom of the card.

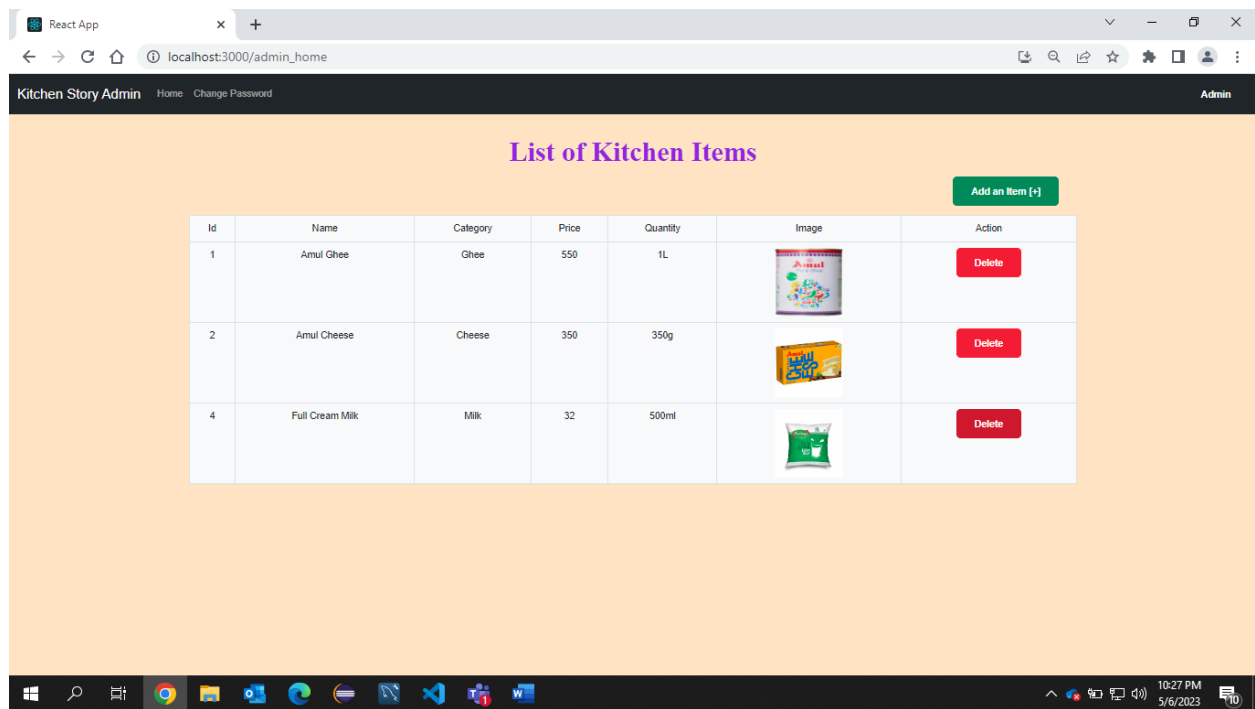

A new Product will be added

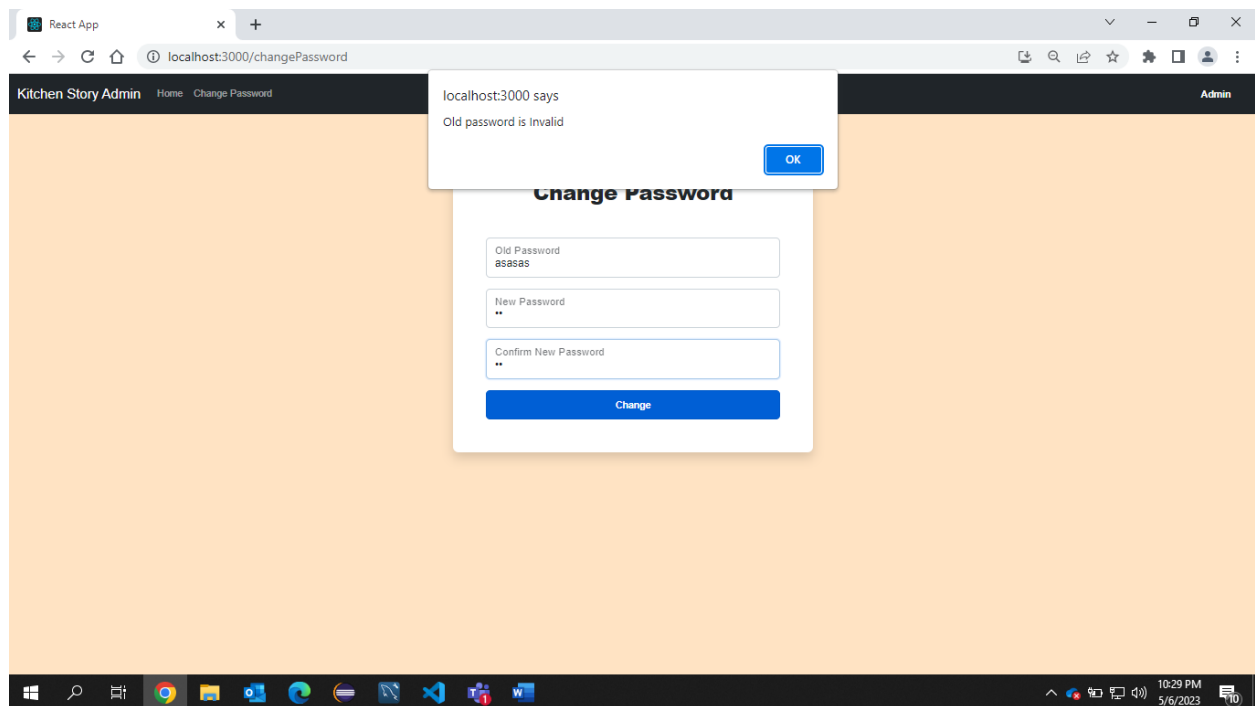

We will be redirected to AdminHome page with newly added item

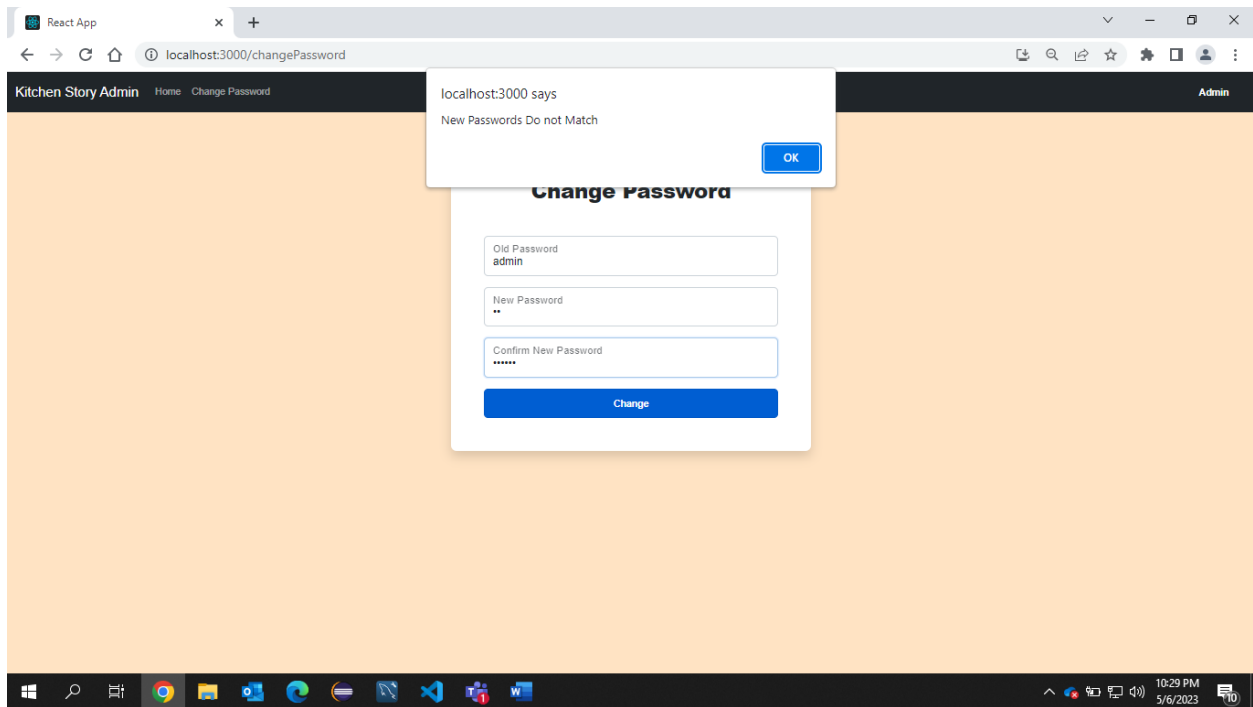

If I click on Delete for 3<sup>rd</sup> Product That product will be deleted

In the Change Password Page If the entered old is wrong then it will display the error

If the New Password and Confirm New Password are mismatched then It will throw an error

If all the details are entered correctly then Password will be changed Successfully
